

My name is Stefania Stoica and I am currently pursuing a double major in Neuroscience and French Literature at the university of Toronto. I find great passion in the topic of mental health, as well as researching means for us to provide greater accessibility to those suffering from it. I have experience as a research assistant for CAMH, where I contributed to researching methods to promote changes in postgraduate medical education. Additionally, I am part of the executive committee for the UofT Fitness and Mental Health Club, and our team hopes to bring forth some ideas to improve the mental health of students on campus. I am very excited to be working with this community!
